Process Report — Search Time

DEMO DATA — FICTIONAL — all figures are fictional.

This fictional report studies how much time teams lose searching for documents. Charts on pages 3 and 6 carry captions and data tables so Kohu can cite them exactly.

Method

We surveyed four fictional teams (Atlas, Beacon, Cobalt, Dune) over two quarters and logged median minutes per search.

Search time by team

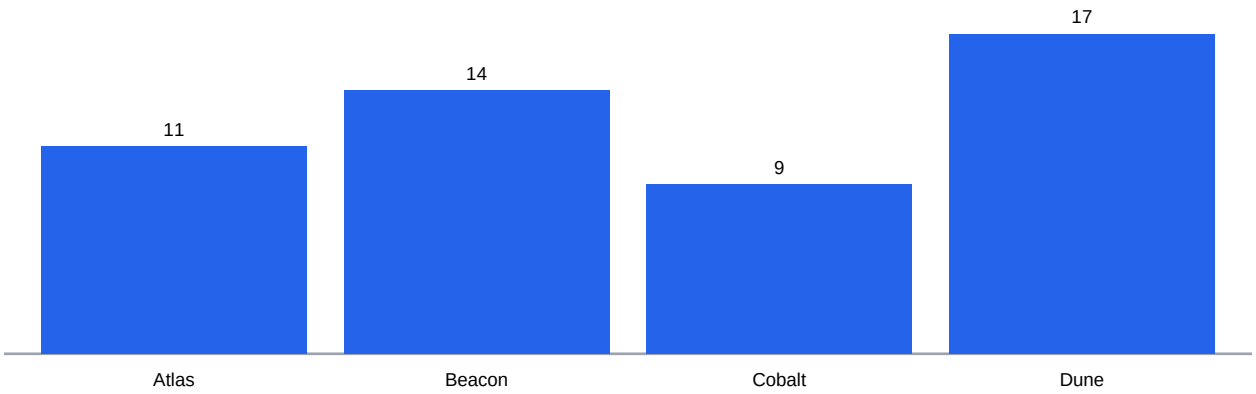

Figure 1: Median minutes per search by team, Q2 (fictional). Dune is slowest at 17 minutes; Cobalt fastest at 9 minutes.

Data behind Figure 1 (p.3).

Team	Median minutes
Atlas	11
Beacon	14
Cobalt	9
Dune	17

Findings

Fictional findings text for page 4. Teams with a shared hub search faster than teams relying on chat history.

What changed

Fictional what changed text for page 5. Teams with a shared hub search faster than teams relying on chat history.

Trend over six months

Figure 2: Median minutes per search, Jan-Jun (fictional). Search time falls from 16 to 10 minutes after the hub pilot.

Data behind Figure 2 (p.6).

Month	Median minutes
Jan	16
Feb	15
Mar	14
Apr	12
May	11
Jun	10

Recommendations

Fictional recommendations text for page 7 of the process report.

Risks

Fictional risks text for page 8 of the process report.

Appendix

Fictional appendix text for page 9 of the process report.
